

**Folding Seats For Cargo Hauling** in a Town & Country Wagon is an easy task even for a woman. The illustrations at right show how seats look in their raised position, being folded and when they're down. Here's how it's done:

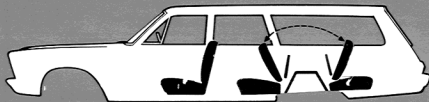

1. Release the latch at either side of the second seat-back.

2. Fold the second seat-back forward as shown in picture two. As the seat-back moves forward, a spring-loaded, hinged panel folds down to form the floor behind the seat-back and to lock the seat-back in the cargo position.

3. Open the tail gate and pull the third seat-back toward the rear. Fold the seat-back flush with the floor and press down until it locks in position. A hinged panel, attached to the seat-back completes the floor forward of the seat-back.

One . . . Release Latch

Two . . . Fold Second Seat-Back Down

Three . . . Lower Tail Gate, Fold Third Seat-Back

# T & C WAGON SPECIFICATIONS

## EXTERIOR DIMENSIONS

Wheelbase.....	121.0"
